A subtraction problem using cars. The first box contains 3 cars (2 purple, 1 blue) with a red dashed circle around the blue car and a red arrow pointing to the second box. The second box contains 1 blue car. The third box contains 2 purple cars. Below each box is a small empty box for the answer.

$$\square - \square = \square$$

A subtraction problem using fish. The first box contains 4 yellow fish with a red dashed circle around one fish and a red arrow pointing to the second box. The second box contains 1 yellow fish. The third box contains 3 yellow fish. Below each box is a small empty box for the answer.

$$\square - \square = \square$$

A subtraction problem using grasshoppers. The first box contains 4 green grasshoppers with a red dashed circle around two grasshoppers and a red arrow pointing to the second box. The second box contains 2 green grasshoppers. The third box contains 2 green grasshoppers. Below each box is a small empty box for the answer.

$$\square - \square = \square$$

A subtraction problem using basketballs. The first box contains 6 orange basketballs with a red dashed circle around two basketballs and a red arrow pointing to the second box. The second box contains 2 orange basketballs. The third box contains 4 orange basketballs. Below each box is a small empty box for the answer.

$$\square - \square = \square$$

A box containing 6 green frogs. A red dashed circle highlights 3 frogs, and a red arrow points to a box containing 2 frogs. This is followed by an equals sign and a box containing 3 frogs. Below each box is a small empty box for the answer.

$$\square - \square = \square$$

A box containing 9 black and white dogs. A red dashed circle highlights 3 dogs, and a red arrow points to a box containing 3 dogs. This is followed by an equals sign and a box containing 6 dogs. Below each box is a small empty box for the answer.

$$\square - \square = \square$$

A box containing 6 green turtles. A red dashed circle highlights 1 turtle, and a red arrow points to a box containing 1 turtle. This is followed by an equals sign and a box containing 5 turtles. Below each box is a small empty box for the answer.

$$\square - \square = \square$$

A box containing 10 blue and green butterflies. A red dashed circle highlights 3 butterflies, and a red arrow points to a box containing 3 butterflies. This is followed by an equals sign and a box containing 7 butterflies. Below each box is a small empty box for the answer.

$$\square - \square = \square$$
