

## SIVI ÖLÇME

\* Aşağıda belirtilen sıvıların ölçülerinde mililitre kullanılanları işretleyelim.

şurup

bir bardak su

bir damacana su

bir varil benzin

göz damlası

\*Aşağıdaki dönüşümleri örnek teki gibi yapalım.

$$4 \text{ L} = \dots\dots\dots 4000 \text{ mL}$$

$$4 \times 1000 = 4000 \text{ mL}$$

$$7 \text{ L} = \dots\dots\dots \text{ mL}$$

$$\dots\dots\dots$$

$$12 \text{ L} = \dots\dots\dots \text{ mL}$$

$$\dots\dots\dots$$

$$5 \text{ L} = \dots\dots\dots \text{ mL}$$

$$\dots\dots\dots$$

$$19 \text{ L} = \dots\dots\dots \text{ mL}$$

$$\dots\dots\dots$$

$$8 \text{ L} = \dots\dots\dots \text{ mL}$$

$$\dots\dots\dots$$

$$24 \text{ L} = \dots\dots\dots \text{ mL}$$

$$\dots\dots\dots$$

$$45 \text{ L} = \dots\dots\dots \text{ mL}$$

$$\dots\dots\dots$$

$$36 \text{ L} = \dots\dots\dots \text{ mL}$$

$$\dots\dots\dots$$

\* Aşağıdaki dönüşümleri örnekteki gibi yapalım.

$$5000 \text{ mL} = \dots\dots\dots 5 \text{ L}$$

$$5000 \div 1000 = 5 \text{ L}$$

$$8000 \text{ mL} = \dots\dots\dots \text{ L}$$

$$\dots\dots\dots$$

$$14000 \text{ mL} = \dots\dots\dots \text{ L}$$

$$\dots\dots\dots$$

$$3000 \text{ mL} = \dots\dots\dots \text{ L}$$

$$\dots\dots\dots$$

$$19000 \text{ mL} = \dots\dots\dots \text{ L}$$

$$\dots\dots\dots$$

$$6000 \text{ mL} = \dots\dots\dots \text{ L}$$

$$\dots\dots\dots$$

$$27000 \text{ mL} = \dots\dots\dots \text{ L}$$

$$\dots\dots\dots$$

$$53000 \text{ mL} = \dots\dots\dots \text{ L}$$

$$\dots\dots\dots$$

$$35000 \text{ mL} = \dots\dots\dots \text{ L}$$

$$\dots\dots\dots$$
